

Final 163 Project

3 Lanky Boys

Brady, Terry, Georgio

Abstract

PS1 console in a void
surrounded by game
footage.

Starts with camera
pointing at PS1
opening placed on a
texture with CRT
effects, then zooms out
past ps1 console.

Console can be affected
with model shaders, and
can take in different
games and show
gameplay with the
post-processing effects.

Console Model

tinkerCAD created
PS1 model, with
openable disk flap

Wireframe

Console Shaders

Modify the mesh of
the console using
vert/frag shaders

Pixelized

CD Reflection

Hologram

Running Games

Disk can go into console
(animated tween),
changing the video
output of the background

Video Processing

- Scan Lines
- Static
(Horizontal Noise)
- Chromatic Aberration
- Corner Curvature

post-processing
video shaders,
rendering to texture
